- Antitrust
- Antitrust Damages
- Data Science and Analytics
- Public Policy and Impact Assessment

Sectors

- Telecoms, Media and Technology
- Transport

Profile

Célia is a member of Oxera's Transport and Analytics teams. She specialises in applying quantitative methods to a diverse range of economic issues. She also has experience in applying econometric and other quantitative methods to various projects including mergers and acquisitions, cartels, impact assessments, and cases of abuse of dominance.

Before joining Oxera, Célia obtained a Master's degree in Managerial and Financial Economics from HEC Paris, specialising in econometrics. During her studies, she completed an internship in the economic studies department of an international research institute.
