Tel: +49 (0) 30 7675 99114

Languages: English, German and Italian

Expertise

- Data Science and Analytics
- Public Policy and Impact Assessment
- Sustainability and Climate Change

Sectors

- Digital
- Energy

Profile

Mona is a member of Oxera's Energy and Analytics teams. Her work involves applying quantitative economic analysis and data science techniques to projects in the energy, digital and transport sectors. Mona is particularly interested in helping clients understand the economics of climate change and deliver decarbonisation in the most efficient way. In her project work, she advises clients across Europe, with a focus on Germany.

Before joining Oxera in 2018, Mona completed a Masters degree at Bocconi University. She also has experience at the European Commission, where she was part of the economic and trade section.

Selected professional experience

- Advice to an energy company on network tariffs in relation to Ofgem's Targeted Charging Review (2019–)
- Cost efficiency benchmarking work for a European electricity distribution and transmission network company (2019–)
- Cost modelling for UK water companies in relation to Ofwat's cost efficiency analysis (2019–)
- Damages quantification in relation to a cartel finding in the telecoms industry (2019–)
- Advice on the creation of an incentives system for European cross-border energy trade, using both theoretical and data-driven analysis (2018–)
- Damages estimation in a German transport sector abuse of dominance case, on behalf of the claimant (2018–)

Qualifications

- MSc Economic and Social Sciences, Bocconi University, Italy
- BSc (Hons) European Studies (Focus: Economics), Maastricht University, the Netherlands
