- Antitrust Damages
- Finance and valuation
- Regulation

Sectors

- Energy

Profile

Andrea is a member of Oxera's Finance & Valuation team, in which he applies his skills in corporate finance, valuation, damages estimation and regulatory finance. He has advised on a range of energy transmission and distribution regulatory projects, with a particular focus on the estimation of the regulatory cost of capital. Andrea has also advised Portuguese and Italian electricity transmission companies during their consultation process with the regulator, and a British utility company in its regulatory appeal. He has also worked on a damages quantification case concerning a cartel market in Italy.

Selected professional experience

- Advised a UK utility network on the cost of equity calculation during the appeal process with the regulator (2021–)
- Advised an Italian regulated utility company on the cost of capital calculation during the consultation process with the regulator (2021–)
- Analysis to find the correct valuation of a derivative financial product as part of an appeal for a bank in London (2021)
- Analysis on the financeability model for a UK regulated electricity distribution company (2021)
- Damages estimation on the profitability and investment capacity of an Italian company following the payment of a sanction due to the creation of a cartel market (2021)
- Advised a Portuguese regulated utility company on the cost of capital calculation during the consultation process with the regulator (2021)

- Analysis on the relative risk of different investment opportunities in the Internet cable sector for a UK telecoms company (2020–21)

Qualifications

- MSc Finance, Warwick Business School, UK
- BSc Economics, Queen Mary University of London, UK
