- Regulation

Sectors

- Transport

Profile

Ilianna is a member of Oxera's Regulation and Market Design team. Her work involves applying data science and quantitative economic analysis to projects in a range of sectors, with a focus on transport markets. Since joining Oxera in 2020, Ilianna has advised on impact assessments, commercial strategy, antitrust damages claims and disputes.

Selected professional experience

- Support to a Collective Management Organisation for musical works in an antitrust dispute (2022)
- Data analysis and visualisation of performance and financial indicators for a UK infrastructure client (2022)
- Support to National Highways on the development of the strategic case for the Lower Thames Crossing (2021–22)
- Development of a benchmarking report, including engagement with stakeholders for Network Rail (2021–22)
- Economic impact assessment of a greenfield rail infrastructure project in Europe (2021–22)
- Impact assessment of the COVID-19 travel restrictions in the UK economy for a UK airport (2021)
- Economic valuation of the GB rail carbon reduction for the Rail Delivery Group (2021)
- Quantification of the economic value of the rolling stock supply chain to the UK economy for Rail Forum Midlands (2021)
- Assessment of the national economic impacts of Gatwick Airport's proposed capacity expansion using transport appraisal methods (2021–)

- Support to a Greek brewery in an antitrust damages claim related to an abuse of dominance case (2021–)
- Review of a transport appraisal related to bus reform for a bus operator as part its response to a public consultation (2021)
- Strategic advice to a European rail infrastructure operator in formulating a concession agreement with a national railway operator (2020)
- Analytical support to a European airport on a contractual dispute (2020)

Qualifications

- MSc Economics, University of Leeds, UK
- BSc Economics, Athens University of Economics and Business, Greece
