Economic Consultants - all career levels

Start date

Ongoing—starting in 2023

Teams

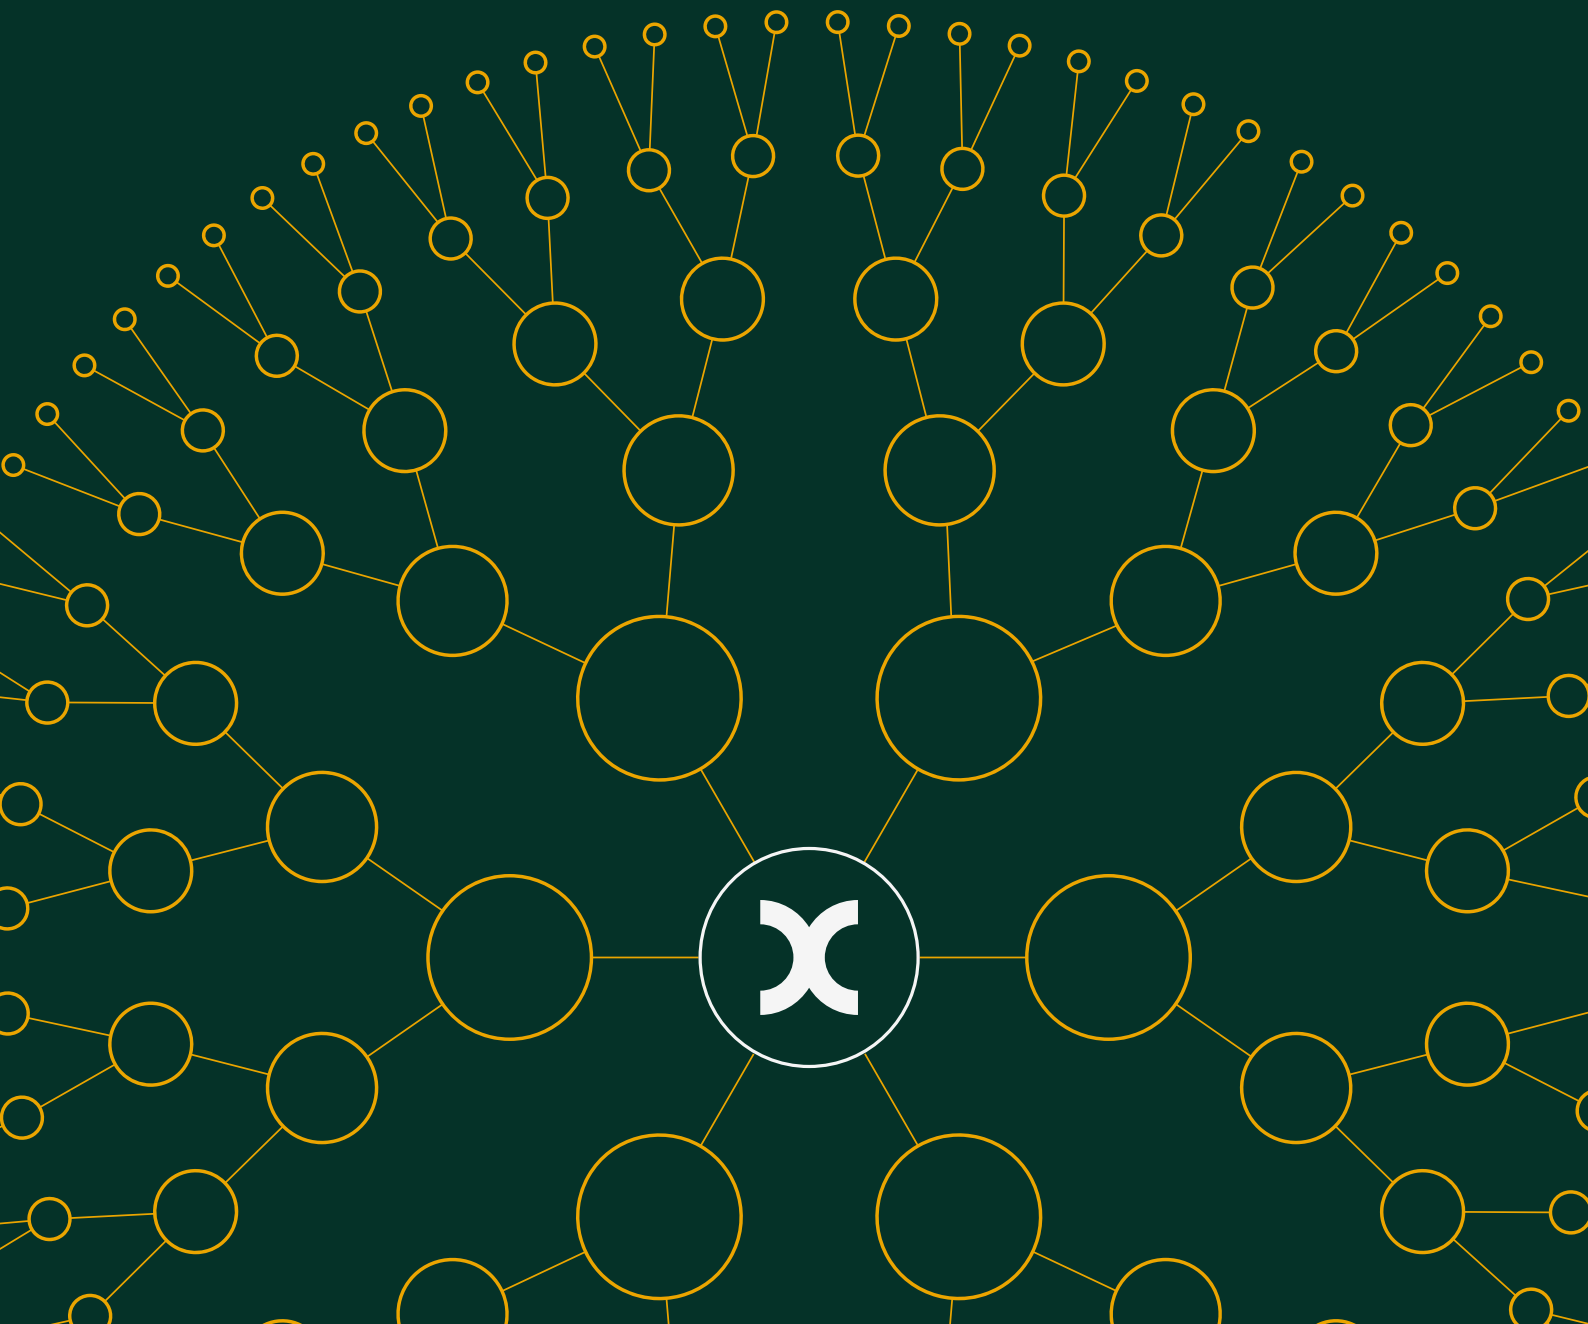

Competition Economics, Regulation and Market Design, Econometrics and Data Science, Finance and Valuation

Location

Berlin, Hamburg, Brussels, London, Milan, Oxford, Paris or Rome

What difference will **you** make?

Economic Consultants—all career levels

Part or full-time | Permanent position/Internship/Work experience | Home office possible

If this is of interest, please do send us your application—we look forward to receiving it. If you have any questions about the role or the application process, please email recruitment@oxera.com.

Are you interested in the interaction between companies, consumers and markets? Do you like working with data? Are you able to present complex relationships in a comprehensible way? Do you thrive in working in a client-focused team?

If the answer to these questions is yes, Oxera is the place for you. From graduates to experienced project managers, we are looking for economists to advise companies, policy makers, regulators, courts and lawyers on issues related to competition, finance and regulation. Our project work includes cases worldwide, with a particular focus on European markets.

About Oxera

Oxera is a leading economics consultancy, with offices across Europe. With more than 170 consultants, we apply our economic and financial expertise to help our clients make more informed decisions. A collaborative culture, flat hierarchies and flexibility are important to us. At Oxera, you will have the opportunity to gain experience in a wide range of products and sectors. We will support you as you develop in your career—providing you with a variety of training opportunities.

Who are we looking for?

- You will have a university degree in economics or finance (Bachelor's, Master's or PhD) or are currently in the process of obtaining one
- Ideally, you already have some relevant work experience (for senior positions)
- You are a highly motivated and dedicated team player who enjoys working in an international environment
- You enjoy communicating with clients
- You like to work with scientific methods, and have strong analytical skills
- You have very good written and spoken English skills—further foreign language skills (particularly German, Dutch, French, Italian or Spanish) are desirable
- Knowledge of Stata, R, Python or Excel is desirable (especially for junior positions)

What can we offer?

- An international and collaborative work environment, with mobility between our offices
- Regular client contact, face-to-face and virtual
- Flexible working hours—particularly the choice between full-time and a four-day week
- A structured career path, with an attractive compensation package
- A wide range of training and development opportunities
- The prospect of working with some of the brightest and most experienced minds in the industry
